Forecast for Sunday 06 Feb 2022

Weather: . Outbreaks of rain overnight turning heavy and persistent. Rain in the morning clearing to bright spells and occasional showers, the odd one could be heavy. These showers falling as sleet or snow above 500m. Feeling bitterly cold with northwesterly gales and a severe wind chill. Becoming drier with lengthening clear spells in the evening.

Chance of cloud-free hill tops above 600m: 70%. Highly variable as showers come and go with views quickly disappearing at times.

Low cloud and visibility: Mainly good between showers but cloud occasionally descending to 400 or 500m as showers move through. Occasional poor visibility on the tops in sleet or snow.

15:00 on Sat 05 Feb 2022	17mm	23.6mm	23.8mm

Forecast for Monday 07 Feb 2022

Weather: Clear spells and a widespread frost overnight. A dry and bright start but cloud increasing through the morning. Outbreaks of light rain or drizzle will spread east from late morning onwards, briefly preceded by light snow above 400m. Low cloud and poor visibility will be the main issue to deal with in the afternoon.

Maximum wind: Southwesterly 20-25mph gusts 30-35mph.

Chance of cloud-free hill tops above 600m: 90% at first but becoming Nil by early afternoon as cloud lowers.

Low cloud and visibility: Excellent to start the day but deteriorating from late morning with extensive cloud and fog developing above 300 or 400m. Below the cloud, hazy, often a few kilometres in rain or drizzle in the afternoon. Cloud may lift a little towards evening.

Temperature: **Valleys:** Minus 1 Celsius gradually rising to 9 or 10 Celsius.
At 600m: Minus 1 Celsius, slowly rising to Plus 5 Celsius.
Freezing level: 400m at first with frost in valleys, rising above summits late morning.
